Manual application Save_Vehicle :

- ✓ This document constitutes a manual for the use of my application Save_Vehicle, software developed in the context of the 2006-2017 synthesis project.
- ✓ This software allows to list the breakdowns and the reasons of a vehicle, the allocation of a parking place to this car and to register this vehicle with its number all the information.
- ✓ The recommendations can be consulted directly, but it is preferable to read my functional specification report in advance.
- ✓ The purpose of the Save_Vehicle software is to be able to gather all the information necessary to the condition of a vehicle when entering a depot.
 - ✓ The Save_Vehicle application is part of TheOriginals. After the launch of the latter the application Save_Vehicle will be usable.

Launch TheOriginals application

✓ The main window of the Save_Vehicle application is as follows :

On this window you can search a vehicle with its registration number, list the reasons for visits and breakdowns before registering.

✓ Search a vehicle with its registration number :

Information du vehicule

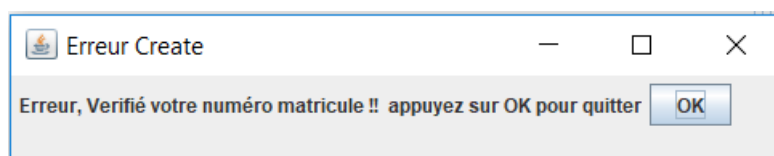

Matricule

Modele

Marque

Type vehicule

Enter the vehicle registration number (Car or Bike) in front of you and click on the Search button, if the registration number exists the information is filled in by itself or the following window is displayed :

✓ List of visiting motif :

Motif de visite et panne constate

Motif visite

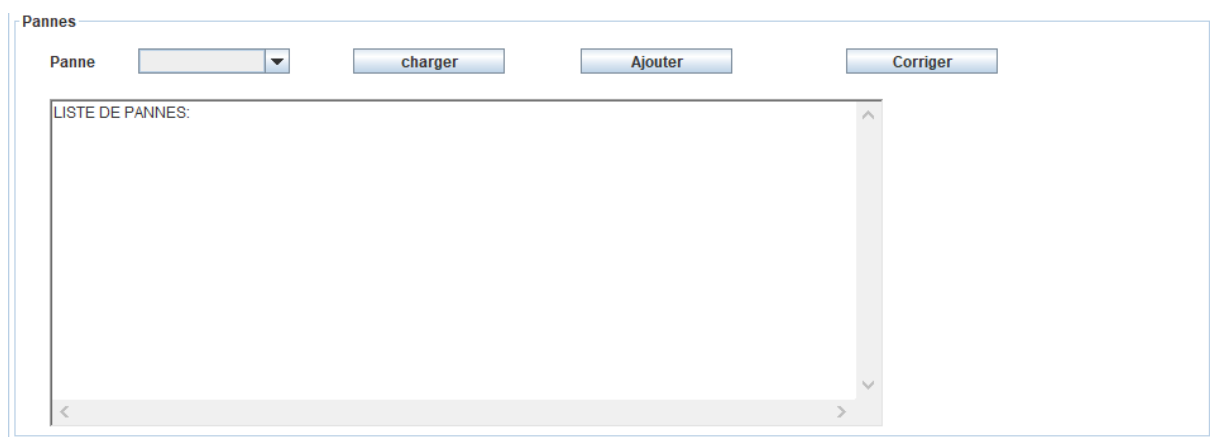

Motif

LISTE DE MOTIFS:

< > ^ v

Click the button « Charger » to retrieve the patterns from the database and choose the pattern. The button « Ajouter » allows to add a visiting motif to the list and if the warehouseman go wrong, he can restart by the button « Corriger ».

✓ List of breakdowns :

The screenshot shows a window titled "Pannes". At the top, there is a label "Panne" followed by a dropdown menu. To the right of the dropdown are three buttons: "charger", "Ajouter", and "Corriger". Below these elements is a large rectangular area labeled "LISTE DE PANNES:" which contains a scrollable list. The list is currently empty, and the scroll bar on the right is at the top position.

Click the button « Charger » to recover the breakdown from the database and select the breakdown. The button « Ajouter » allows to add a breakdown to the list and if the warehouseman go wrong, he can restart by the button « Corriger ».

✓ Save information in the database:

Annuler

Enregistrer

Reprendre

Click the button « Enregistrer » to save the information in the database and Cancel to cancel. If you click the button « Annuler » the windows will close. The

Warehouseman can restart with the button « Reprendre » for save an other vehicle. If the button « Enregistrer » work the following windows will display to give time of vehicle repair and the parking place.
